The Patriot OSP Cabinets

Protection You Can Count On

The Patriot is designed to protect your equipment in the harshest of environments. Constructed to meet Nema 3, 3R and 4 standards *The Patriot* protects your equipment for the worst mother nature can throw at it.

Protection that Lasts

- *The Patriot* is constructed from .125 Aluminum and powder coated with polyester powder coating. Designed and tested to achieve 1000 hours of salt spray, which exceeds GR487 standards. *The Patriot* is equipped with stainless steel hardware for a lifetime of maintenance free service. Built and tested to withstand the test of time. .
- *The Patriot* protects your equipment from vandalism. All equipment access doors are secured with heavy duty, stainless steel, three point latching systems and battery box access doors are secured with 1/4 turn stainless steel latches.

Functionally

The Best in the Business

The Patriot with its integrated side access multifunction enclosure, front and rear access rack mount equipment chamber and isolated, vented battery compartment, is versatile enough for any application.

The side access multifunction enclosure can be used to house fiber splice and storage equipment, customer access equipment or standard POTS connection devices.

The battery compartment features front and rear access doors and will house up to 4 standard telecommunication style batteries. Battery trays can be added in the equipment chamber for additional back up requirements.
